EDUCATION

Santa Clara University **Santa Clara, CA**

Bachelor of Science in Computer Science and Engineering *Expected June 2027*

- GPA: 3.8/4.0

Relevant Coursework

- Software Engineering, Operating Systems, Computer Networks, Database Systems, Algorithms, Machine Learning

SKILLS

- **Programming Languages:** TypeScript, Python, JavaScript, SQL, C, C++
- **Infrastructure & DevOps:** Kubernetes, Helm, Terraform, Docker, GitHub Actions, DataDog
- **Backend & Data:** Flask, Node.js, PostgreSQL, Pandas

EXPERIENCE

Resmed **San Diego, CA**

Platform Engineering Intern *June 2025 - Present*

- Engineered Kubernetes namespace-provisioning system with **Kubernetes SDK** and **Helm APIs**, replacing manual setup
- Scoped new namespaces to specific repos and added retry/rollback, cutting failed deploy risk during Helm upgrades
- Built **AI pipeline** that classifies DevX Slack messages by regex and LLM to surface real developer pain points
- Automated weekly and monthly pain-point reports to Slack, giving leads visibility into recurring platform issues
- Designed a self-service **Backstage** portal that auto-generates GitHub issues and Slack alerts for service access requests
- Built a full-stack GitHub Copilot budget tool (**Node.js, PostgreSQL/SQLite**) for usage tracking and approvals
- Rebuilt DevX's bash-driven Slack announcements in **TypeScript**, adding live message editing and color-coded tags
- Configured **DataDog** dashboards via **Terraform** to track EKS metrics through the Ingress-to-Gateway migration
- Earned "**Outstanding Presentation**" honors and three **internship extensions** for sustained technical impact

Other

- **Retail Sales Associate**, Vuori, (Apr–Jun 2025) — exceeded sales goals through tailored customer solutions
- **Tour Guide**, San Diego Bike and Kayak, (Jul–Sep 2024) — led 15+ weekly kayak tours, managing safety and logistics

PROJECTS

MatchDay (Premier League Analytics Platform) | Demo **March 2026**

- Built a **Flask** analytics platform merging FPL, Understat, and API-Football data with a team of 4 developers
- Engineered the data pipeline's cross-source player matching using Unicode normalization and fuzzy joins
- Developed player and team comparison **APIs** with percentile charts and per-90 normalized metrics
- Authored test suites enforcing a 60% coverage gate across pipeline, routes, and auth modules

Disneyland Ride Wait Time Predictor | GitHub Repo **November 2025**

- Built a time-series forecasting tool using **Pandas**, **XGBoost**, and **NHITS** to predict Disneyland ride wait times
- Engineered temporal and environmental features (hour, seasonality, rainfall, holidays) to model complex system behavior
- Evaluated model performance using MAE and residual analysis, achieving **20% lower error** than baseline

AWSxInrix Hackathon | GitHub Repo | DevPost **November 2024**

- Designed AI Chrome extension using **AWS Bedrock** to simplify web navigation for older users, working with team of 4
- Built **Flask** APIs to handle natural language queries and route them to Claude, enabling real-time context-aware responses
- Achieved 15-second improvement in average task completion time during user testing

LEADERSHIP & INVOLVEMENT

Santa Clara University **Santa Clara, CA**

Resident Assistant/Peer Educator *September 2025 - Present*

- Built and supported a community of 60 students through programming, mentorship, and daily engagement
- Led study sessions and provided mentorship to improve student understanding and confidence
